

## POWERFUL DIAGNOSTICS FROM YOUR SMART WIRELESS DEVICES

### JUMPSTART YOUR WIRELESS PROGRAM WITH A SMARTPACK

Emerson's comprehensive Wireless SmartPack is designed to give you the tools you need to receive full value from your smart wireless investment. Along with the devices and Smart Wireless Gateway, the Wireless SmartPack includes AMS™ Suite: Intelligent Device Manager predictive maintenance software and the AMS Wireless SNAP-ON™ application. AMS Device Manager delivers real-time predictive diagnostics from your smart wireless devices — and your wired devices too. Use a single tool to configure and commission devices.

The benefits of AMS Device Manager extend past the initial configuration and commissioning of wireless devices. Continued use of AMS Device Manager provides predictive diagnostics and real-time field device information to improve plant availability and performance. A new graphical interface for field devices presents compelling visualization to aid in troubleshooting and support decision-making.

### AMS DEVICE MANAGER USERS EXPERIENCE BENEFITS

- **Configure wireless devices in inaccessible locations.** Wireless devices will extend your reach into plant locations that are inaccessible or difficult to reach during normal operation. AMS Device Manager allows you to configure devices in those impossible-to-reach areas.
- **Gain insight into stranded assets.** Use the Smart Wireless THUM™ Adapter with existing HART devices to wirelessly transmit diagnostics to AMS Device Manager.
- **Troubleshoot quickly.** Remotely access status and diagnostic information from connected devices to identify issues. Use AMS Device Manager to easily make configuration changes or perform device maintenance.
- **Plan and validate wireless networks.** Use the AMS Wireless SNAP-ON application to efficiently plan, deploy, and manage your wireless networks.

AMS Suite: Intelligent Device Manager powers PlantWeb through predictive and proactive maintenance of intelligent field devices to improve availability and performance.

## DELIVERS THE RESULTS YOU NEED

### A SIMPLER WAY TO INTRODUCE SMART WIRELESS

Emerson's Wireless SmartPack features all the tools you need to set up a successful wireless system in your plant. With SmartPack, you will receive:

- AMS Device Manager with a 5-, 15-, or 25-tag Server Plus Station
- Smart Wireless Interface
- AMS Wireless SNAP-ON application
- 1 Year of Foundation Support\*
- HART® modem

\* Includes technical phone support and upgrades of AMS Device Manager for 1 year.

### WHAT IF I ALREADY HAVE AN AMS DEVICE MANAGER SYSTEM?

You are already one step ahead! Current AMS Device Manager users can enhance their existing systems to support smart wireless capabilities and the Smart Wireless THUM Adapter. AMS Device Manager must be upgraded with:

- Smart Wireless Interface
- Version 10.5 or higher
